

MAGIC
STEAM WAND

 **Saeco**

MAGIC

STEAM WAND

Magic M1 is now also available with an integrated steam wand to further expand the offering.

Magic Steam Wand allows you to make a cappuccino artfully, much better than at the bar, by first dispensing coffee and then milk, expertly whipped with the steam wand.

It is possible to handle two types of milk, such as cow's milk and vegetable milk, which when added to espresso create a creamy blend for a perfect cappuccino.

Like the M1 and M2 versions, Magic M1 Steam Wand also allows automatic brewing of cappuccino, milk, and American coffee.

Activating the steam wand also makes it possible to heat the beverage for those who prefer the very hot taste.

Magic is more and more Magic.

Highlights

- 8.5 to 15 g variable chamber coffee unit
- 7" touch screen
